

# PDM GROUP

## BIO-LIQUIDS DISPOSAL SERVICE

- The introduction of tough new legislation has severely restricted the disposal routes for bio-degradable liquids.
- Disposal routes such as land injection and spreading for raw animal bloods are no longer available and Food producers are coming under increasing pressure to dispose of liquid residues in an environmentally safe, sustainable manner.
- PDM offers a unique, environmentally sound solution for your bio-degradable liquid disposal problems.
- We have used our long established expertise in dealing with by-products from the food industry to provide a secure disposal service for bio-

degradable liquid residue streams. Our knowledge and experience in servicing the food industry's recycling requirements is second to none.

- Bio-degradable liquids such as blood, soup, fruit juices, beverages, effluent sludges and wash-down water from all types of food factories is processed by PDM in accordance with the new legislation and used in our power plants generating renewable electricity for the National Grid.
- A completely integrated service is provided with collections tailored to meet your site and product requirements.

SERVING THE FOOD INDUSTRY THROUGH  
CONTINUAL IMPROVEMENT
